Tagore Engineering College

B.Tech – Information Technology

Chennai, Tamil Nadu

SKILLS

- JavaScript
- React
- Node.js
- MongoDB
- Express
- Docker
- Git
- n8n automation
- RESTful APIs
- Socket.io

Surya S

MERN STACK DEVELOPER | FULL STACK DEVELOPER | REAL-TIME-SYSTEMS

Summary

Full Stack Developer experienced in building and deploying production-level MERN stack applications. Developed a real-time chat platform using Socket.io and a textile trading management system based on real-world business needs. Skilled in RESTful APIs, authentication, database schema design, and cloud deployment. Strong problem-solving mindset with a focus on scalable web solutions.

Professional Projects

1. Tex-Tool (Freelance Client Project)

Full Stack Developer | Dec 2025 – Jan 2026 | Chennai

- Built a full-stack textile trading and accounts management system.
- Designed analytics dashboards for sales, purchases, customers, and financial reports.
- Developed CRUD-based inventory, transaction, and ledger modules.
- Architected MongoDB schemas for structured financial data.
- Created RESTful APIs (deployed on Render) and frontend on Vercel.
- Implemented business logic for reconciliation and reporting.

2. Talklet (Independent Project)

Full Stack Developer | Sep 2025 – Dec 2025 | Chennai

- Developed a production-level real-time chat application using MERN stack.
- Implemented bi-directional communication with Socket.io.
- Built RESTful APIs for authentication, chat storage, and session handling.
- Integrated JWT authentication and secure password hashing.
- Deployed backend on Render and frontend on Vercel.
- Optimized performance, responsiveness, and live user tracking.
